

The toughest BBQs around

The Heatlie BBQ series includes some of the toughest BBQs anywhere in the world. All are designed and manufactured in South Australia since 1976 by dedicated Heatlie Engineers.

Originally designed for the commercial industry, the full range of Heatlie BBQs, built to last, are now available for you to enjoy at home, at your sports or social club, or at your school for fund raising events.

These very practical, low maintenance & extremely hard wearing, quality BBQs are available in a range of sizes, in your choice of deluxe stainless steel or powder coated finish to suit your requirements.

All Heatlie BBQs include the superior Ribbon Burner System which uses two precision machined burners to produce a superb, more even heat than the five burner BBQ.

It's no wonder experts choose Heatlie.
